

ADVANCED CLINICAL IS READY TO TRAIN YOU TO BECOME A SAS PROGRAMMER

Advanced Clinical University* (ACU) is a SAS Programmer career overview training program offered to students and graduates who want an entry-level position in the clinical research industry with a foundation for a rewarding career. Advanced Clinical University will provide you with the knowledge and tools you need to succeed in a SAS programming role.

ACU provides access to Advanced Clinical's best-in-class employees, tools, and processes, as well as the potential opportunity to be placed in an Advanced Clinical SAS programmer position upon completion of the program.

Your training with Advanced Clinical University will include:

Remote instructional training presented by Advanced Clinical subject matter experts

Practical experience in study environments

Self-paced, virtual learning to complement instructional webinars

Access to dedicated student portal for ACU training materials

Possible placement upon completion

During your session with Advanced Clinical University, you will be exposed to:

- The history of the FDA and clinical research
- Introduction to Good Clinical Practice (ICH-GCP)
- ICH Guideline: General Considerations for Clinical Trials (E8)
- GxP Overview
- Ethics in Clinical Trials
- Drug Development Process
- Roles and responsibilities of a SAS Programmer
 - Understanding clinical protocols
 - Patient populations
 - Understanding SQL in a clinical trial setting
 - Tables/Listing/Figures
 - CDISC overview
 - Handling data extracts
 - Endpoints

**ACU is not a degree granting educational institution or private school and is not registered with the IL Board of Higher Education*
